

For over 50 years, Onex has been a staple in the Erie community as well as the manufacturing industry. Onex began as a refractory distributor to the local foundries and grew to serve heat intensive industries. Over time, Onex became a custom furnace manufacturer. Today, our team of 100% employee-owners fabricate American made products that are distributed across the U.S.

## ALUMINUM MELTING & HOLDING FURNACES

- Equipment designed for your specific aluminum processes
- Induction or reverbatory configurations
- Energy efficient and quick heat recovery
- Aftermarket service including combustion tuning, corundum removal and refractory relines

## ZINC MELTING & HOLDING FURNACES

- Open bath configuration with electric and gas options
- Radiant tubedesignformaterialuniformityandefficientmelting
- Built in our facility, shipped and installed on your site
- Aftermarket combusiton, controls and refractory service

## LADLES & PREHEATERS

- Precast refractory reline of transfer ladles
- Horizontal and vertical ladle preheater configurations
- Turnkey project management from start to finish from design and engineering to installation
- Aftermarket combustion, controls and refractory service

## PRECAST SHAPES & TROUGHS

- Advanced technology allows for custom designed dimensions using our in-house molding capabilities
- Wide array of materials available to meet your durability and process requirements
- Cast and dried out at our facility to ensure quality product,decreasing downtime
